

MOUNT BARKER
DISTRICT COUNCIL

13 February 2023

Media Statement

Paech Road, Mount Barker

Please see statement below attributed to Council's General Manager Infrastructure, Phil Burton.

“Council is committed to maintaining its roads in good condition to provide a safe environment with a number of streets and roads scheduled for maintenance during the course of the financial year.

“Significant land development has been occurring in recent years on both sides of Paech road. The section of Paech Road north of Potts Road to Sims Road will, over time, take a more urban form and will likely incorporate new road junctions with a reduction in speed limit.

“Design for the renewal and upgrade to this important link road to cater for the growth in Mount Barker is underway.

“In the interim, Council will undertake maintenance as required which includes the application of a new road surface around the intersection of Sims and Paech roads commencing in late March 2023.

“With the completion of the Heysen Boulevard between Paech and Springs roads, Council anticipates that this will take some pressure off the local road network including Sims and Hartmann roads north of Heysen Boulevard.”
