

# STORMWATER ASSETS

## Maintenance Service Levels (MSL)

Mount Barker District Council is responsible for the stormwater network within the district including all stormwater side entry pits and underground pipes and culverts.

Although out of sight and under the ground, the stormwater network plays an important part in the service we provide to the community to ensure stormwater is managed effectively and properties are protected from flooding.

### PURPOSE

The Maintenance Service Level (MSL) outlines how the council plans and delivers stormwater services to the community. It guides both reactive and planned maintenance, helping to prioritise resources and optimise budgets.

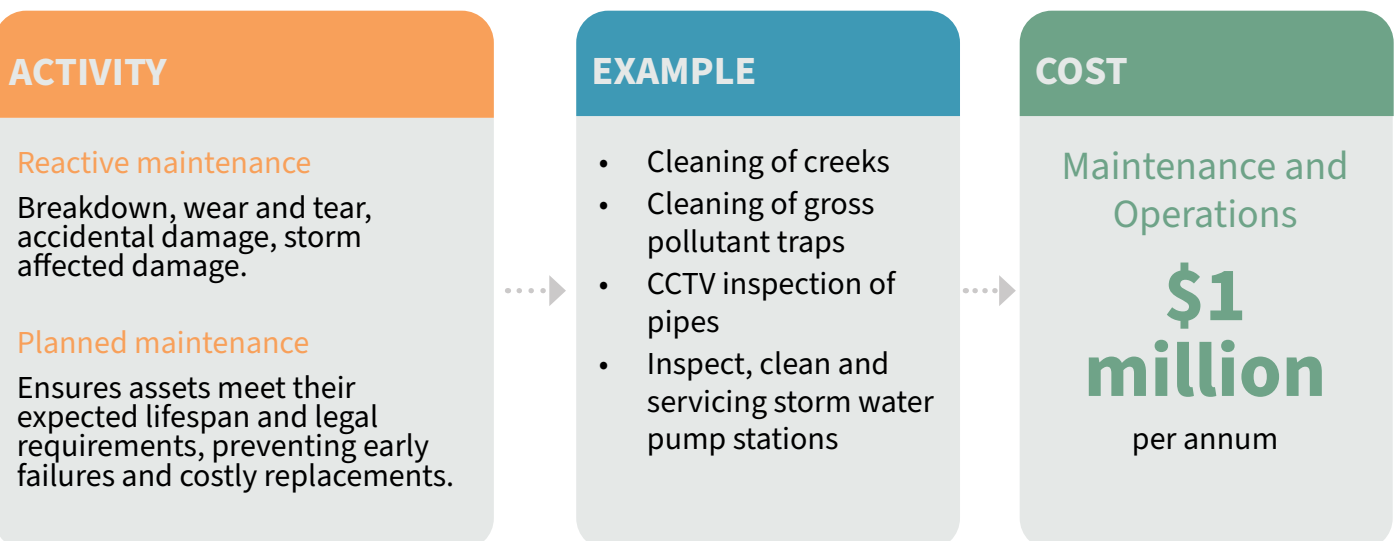

### WHAT WE HAVE

- Underground pipes and culverts
- Stormwater pits
- Creeks and wetlands
- Stormwater pump stations
- Stormwater pipes
- Detention basins
- Water Sensitive Urban Design (WSUD) technologies

### ASSET MAINTENANCE OVERVIEW

Maintenance and operational activities are governed by priorities which will determine frequency and type of activity.
